Greetings;

April 2, 2026

History is made every day when bold individuals join forces. I am writing to invite you to help write the next chapter of human history as a sponsor of the 8th Annual Regenerative Planet Summit. This opportunity is an extremely profitable way to take part in the transformation of our world by lending your support to the development of bold innovations that move our world forward. At every level and in every way, organizations large and small, standing aside people from around the globe, are contributing and this is your invitation to sit at the longest table in the world.

The Trans-Alaskan Pipeline was the catalyst that excelled Alaska into the future. This bold innovation, for good and bad, transformed the state, the people, and the world. As we look beyond the extraction economy as the driver of our future, this is where the adventure begins. Between April 18 and 29th, ARK, in collaboration with WE, Earth Day, Good Planet Broadcast, and a cornucopia of peaceful warriors, will be hosting the 8th annual Regenerative Planet Summit. A hybrid event with local efforts from around the world broadcast on a global virtual stage. Past events have focused on options such as upgrades to our state's energy infrastructure, funding our schools by investing in aerospace, addressing food sovereignty with what comes after the Polaris Hotel, and exploring how AI, as a permaculture solution, helps us thrive. In 2024 we introduced the conception, design, and development of ET3. A 6ft diameter pipeline that can carry oil, gas, cargo, and people all across the state, and by 2100, the planet. This year we are lifting efforts large and small, from around the globe, to harness the power of love and remind people they are the ocean in a drop.

Regeneration is about the security of constant change. Learning from the mistakes of history, we can put people to work healing the planet. By integrating First Nations wisdom into the planning process, we can remember the living planet and our role in this symbiotic relationship. Through permaculture principles, sustainability is the action we take to preserve the natural world we enjoy today for generations far into the future. This summit is focused on solutions and collaborations that will enable Alaska to leap forward, diversify our economy and make sure 140 years from now (7 generations) Alaska, the USA, and the Earth are still great places to raise a family.

For questions, the full pitch deck, or more information, please feel free to contact me. Thank you in advance for your time and consideration. I look forward to this engaging enterprise and hope you can join us.

Sincerely,
Robert Shields

SPONSORSHIP

Inspired by the Green Building Council Leadership in Energy and Efficiency Design (LEED) rating system, the sponsorship levels for the 2026 Regenerative Planet Summit are segmented to maximize opportunity for engagement. Labor and material resources contribute just as much to innovation as do cash contributions and both deserve recognition for their support.

What does it mean to sponsor a Regenerative Planet Summit?

Sponsoring the 2026 Regenerative Planet Summit states you're willing to lend your support to shining a light on the proof of concept of the world of tomorrow that Alaska has the chance to become. Leaping forward is the innovation that made this great state what it is and the pioneering spirit that will inspire innovation for future generations.

What does it cost to sponsor the 2025 Regenerative Planet Summit?

[Donorbox.org/rps26](https://donorbox.org/rps26)

Platinum	\$10,000
Gold	\$5,000
Silver	\$1,000
Bronze	\$100
Certified	\$25

What are the benefits of being a sponsor of the 2025 Regenerative Planet Summit?

As with most sponsored events (as with much of life) the more you put in the more you get out. Standard acknowledgements are provided by rank and if you have any special requests, we are certainly open to innovative partnership arrangements. The ultimate benefit we seek to provide is the stability of markets, the education of the public, and health of our society nestled in a diverse and thriving planet. The financial health of a well-being economy is the investment to keep cost cheap and quality of life rich for all in perpetuity.
